GAURAV DULAL

COMPUTING STUDENT | AI/ML, NLP & APPLIED GENAI INTERNSHIPS

gqurav69@gmail.com | GitHub | LinkedIn | Portfolio | Nepal - Open to fully remote roles

PROFESSIONAL SUMMARY

BSc (Hons) Computing student building applied machine-learning and NLP tools in Python. Hands-on projects combine TF-IDF and stacking ensembles, AST-based code metrics, LSTM severity scoring, Streamlit applications, and LLM/embedding experiments. Seeking a fully remote AI/ML, NLP, or GenAI internship.

EDUCATION

BSc (Hons) Computing | Itahari International College | 2025-2028 (Expected)
Affiliated with London Metropolitan University, UK

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL
ML & Data: scikit-learn, XGBoost, TensorFlow/Keras, PyTorch, NumPy, pandas, Matplotlib, Seaborn, Plotly
NLP & GenAI: TF-IDF, NLTK, LSTM, Hugging Face Transformers, LangChain, embeddings, LLM API integrations, introductory RAG
Modeling workflow: preprocessing, EDA, feature preparation, cross-validation, GridSearchCV, precision/recall/F1, confusion matrices
Apps & Tools: Streamlit, Flask, Jupyter, Git/GitHub, PostgreSQL, REST/API integration

SELECTED PROJECTS

CodeRoast | Python, AST parsing, PyTorch, scikit-learn, LLMs, Streamlit | Live demo
- Built a code-review prototype that extracts complexity, nesting, naming, and duplication metrics for Python, Java, and JavaScript, pairing static analysis with an LSTM severity scorer and LLM-generated feedback.

Text Emotion Classifier | Python, TF-IDF, scikit-learn, Streamlit | Live demo
- Implemented preprocessing, training, and inference for six-class emotion classification with a stacking ensemble (Decision Tree, SVC, Logistic Regression); the repository reports 88.75% test accuracy.

Generative AI with LangChain | LLM integrations, embeddings, Streamlit, Hugging Face
- Implemented chat-model examples, a Streamlit chatbot, CineSage structured extraction, local TinyLlama generation, and embedding experiments; document-based RAG remains an early, incomplete experiment.

ML-Foundations | Python, Jupyter, scikit-learn, deep learning
- Maintains a structured, 65-notebook curriculum from NumPy, pandas, statistics, and EDA through supervised/unsupervised learning, ensembles, tuning, deep learning, NLP, and Transformers; public repo shows 45 stars and 8 forks.

RESEARCH & SELECTED LEARNING

Undergraduate research (in progress): collaborating on a quantitative OOP-purity framework; built an AST-based analyzer and Plotly dashboard for Python, Java, C++, and JavaScript. Project
Courses (Jun 2026): NumPy Essential Training: 1 Foundations of NumPy; pandas Essential Training; Data Visualization with Matplotlib and Seaborn.
